Almost there, KANISHKA! Check your email.

You'll receive a confirmation email soon. If you don't see the email, check your spam folder.

If we're getting a lot of signups at once, it can take a while for us to set up your Developer Edition. We'll send another email when it's ready.

Follow guided steps to finish setting it up, and use in-app guidance to learn Agentforce.

Hi KANISHKA,

Thanks for signing up for a Developer Edition. Now you can start building on Salesforce for free and get hands-on with Agentforce and Data Cloud.

There's just one more step. Use the following link to reset the password for your Developer Edition. This link expires in 24 hours.

Reset Password

To easily log in later, save this URL:
https://orgfarm-5a9cd899f6-dev-ed.develop.my.salesforce.com

Here's the username for your Developer Edition:
kanisankarkanisankar5.2e17266be15c@agentforce.com

Your Developer Edition, now enabled with Agentforce and Data Cloud, remains active as long as

Tabs

Custom Tabs

Help for this Page

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

Run Immediately

End

Configure Start

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ○ A record is created
- ○ A record is updated
- ◉ A record is created or updated
- ○ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

All Conditions Are Met (AND)
